

**Choosing the correct size, before you buy -
Choose - small, medium, or large - before you buy . . .**

Your Fireplace Measurements:

Front Opening Width: _____

Front Opening Height: _____

Model Number: _____

**Pending on size, style or type (see name series for model number size)*

Before you buy, get the right fit.

For masonry fireplaces only - not for prefabricated.
This firescreen is designed to surface mount on the outside of the fireplace.

1. Measure the inside width (W) of your fireplace opening.
2. Measure the inside height (H) of your fireplace opening from the floor to the inside top of opening.
3. Check both measurements and be sure they are accurate to the nearest 1/8".

- **Small** - Fits masonry fireplace opening with a width range of 30" to 37" and height range of 22.5" to 29.5". Overall frame width is 37.5", frame height is 30".*

**Note: Frame height includes the 2" riser bar (riser bar included but not assembled).*

- **Medium** - Fits masonry fireplace opening with a width range of 30" to 37" and height range of 25.5" to 32.5". Overall frame width is 37.5" and frame height is 33".*

**Note: Frame height includes the 2" riser bar (riser bar included but not assembled).*

- **Large** - Fits masonry fireplace opening with a width range of 36" to 43" and height range of 25.5" to 32.5". Overall frame width is 43.5" and frame height is 33".*

**Note: Frame height includes the 2" riser bar (riser bar included but not assembled).*

- If one's fireplace front opening height and width does not fall within the size chart range here, then these glass door fire screens will not work.

- Always keep mesh panels closed and the glass doors open when fire is burning in fireplace.
